SKILLS

TypeScript, JavaScript, React, NextJS, HTML/CSS, Redux, Zustand, NodeJS, Browser Extensions, Electron, Vite, Tailwind, TanStack, ShadCN, Bundlers, Monorepos, Web Performance, Service Workers, LLMs, MCPs, RAG, Prompt Engineering, Cursor, Claude Code, PR Reviews, Mentorship

PROFESSIONAL EXPERIENCE

Product Engineer, AI SaaS

Merlin AI by Foyer

Feb 2025 – Present

Bengaluru, India

- Shipped core **AI SaaS** workflows across chat, desktop coding agents, browser agents, onboarding, growth, and retention using **React, TypeScript**, and reusable frontend architecture.
- Built **ChatGPT Imports, Projects, chat history**, and prompt-driven workflows, helping users preserve context, organize conversations, and reuse AI outputs across sessions.
- Refactored design-system and component patterns across multiple product surfaces, improving accessibility, UI consistency, implementation speed, and frontend review quality.
- Owned **billing, subscription, checkout, and payment** flows, enabling pricing experiments, lifecycle state handling, customer account management, and monetization workflows.

Software Engineer - Influencer Management

SARAL

Dec 2024 – Feb 2025

Bengaluru, India

- Revamped internal analytics dashboards with **React, TypeScript**, and reusable UI patterns, giving growth and operations teams clearer visibility into customer workflows and campaign metrics.
- Built creator content submission and approval workflows, reducing manual coordination across operations, creators, and internal review teams during influencer campaigns.
- Implemented multi-select **drag-and-drop** bulk actions for campaign operations, reducing repetitive creator-management steps and improving internal workflow speed.

Founding Product Engineer - Candidate Assessment & Recruitment Software

Proof-of-Skill Protocol

Jun 2024 – Dec 2024

Bengaluru, India

- Built the frontend for a 3-sided assessment marketplace across validators, candidates, and recruiters, turning ambiguous 0-to-1 product requirements into launch-ready workflows.
- Designed consensus-driven validation, assessment, and review experiences with clear UX states, scalable interaction patterns, and trust-focused decision flows.
- Built real-time **recording, proctoring, API integrations**, and candidate integrity workflows to support reliable remote skill assessment and evaluation.
- Owned frontend architecture, release execution, and deployment from prototype to launch, balancing speed, maintainability, and rapid product iteration.

Frontend Engineer (Lead) - AI Recruitment Software

StartupHire

Aug 2023 – Jan 2024

Remote

- Led frontend delivery for a recruiting workflow **SaaS** platform, improving candidate pipeline management, hiring operations, and recruiter productivity.
- Integrated multiple job boards and application sources into a unified recruiter dashboard, centralizing candidate intake, workflows, and pipeline visibility.
- Shipped recruiting automation and **GenAI-powered** product features from planning to release, supporting recruiter screening, outreach, and pipeline management workflows.

Frontend Engineer - Realtime Location SaaS

Locus Connect (NYCU)

Jul 2022 – Jul 2023

Hsinchu, Taiwan

- Built frontend systems for a real-time **3D indoor positioning platform**, integrating IoT telemetry, location data, and interactive spatial visualization workflows.
- Developed real-time 3D indoor maps with **React, Three.js, GSAP**, state management, and rendering optimizations for smooth telemetry visualization.
- Improved indoor positioning accuracy from approximately **20cm to under 10cm** through HDOP optimization, telemetry analysis, and iterative calibration.
- Managed production infrastructure with **Docker, NGINX, load balancers**, and networking configurations to keep real-time visualization environments stable.

EDUCATION

National Yang Ming Chiao Tung University

Hsinchu City, Taiwan

Research Program, Computer Software Engineering

Jul 2023

Visvesvaraya Technological University

Karnataka, India

Bachelor of Engineering, Electronics and Communication

Sep 2022
