SKILLS

TypeScript, JavaScript, React, NextJS, HTML/CSS, Redux, Zustand, NodeJS, Browser Extensions, Electron, Vite, Tailwind, TanStack, ShadCN, Bundlers, Monorepos, Web Performance, Service Workers, LLMs, MCPs, RAG, Prompt Engineering, Cursor, Claude Code, PR Reviews, Mentorship

PROFESSIONAL EXPERIENCE

Product Engineer, Merlin AI (AI SaaS)

Feb 2025 – Present

Merlin AI by Foyer

Bengaluru, India

- Own frontend delivery for **AI SaaS** products across chat, desktop coding agents, browser agents, onboarding, growth, and retention workflows using **React**, **TypeScript**, and reusable product architecture.
- Built and shipped **ChatGPT Imports, Projects, chat history**, and prompt-driven workflows, turning ambiguous AI product requirements into polished, production-ready interfaces.
- Modernized design-system and component patterns across multiple product surfaces, improving accessibility, UI consistency, implementation speed, and review quality.
- Maintained **billing, subscription, checkout, and payment** experiences, supporting monetization workflows, conversion experiments, lifecycle states, and customer account management.

Software Engineer - Influencer Management

SARAL

Dec 2024 – Feb 2025

Bengaluru, India

- Revamped internal analytics dashboards with **React**, **TypeScript**, and reusable UI patterns, improving visibility into operational metrics, customer workflows, and growth-team decisions.
- Built content submission and approval workflows for influencer campaigns, reducing manual coordination between operations, creators, and internal review teams.
- Implemented multi-select **drag-and-drop** interfaces for bulk campaign actions, improving usability, workflow speed, and day-to-day productivity for internal users.

Founding Product Engineer - Candidate Assessment & Recruitment Software

Proof-of-Skill Protocol

Jun 2024 – Dec 2024

Bengaluru, India

- Led frontend engineering for a multi-sided MVP marketplace across validators, candidates, and recruiters, converting ambiguous product requirements into production workflows.
- Designed consensus-driven validation, assessment, and review experiences with clear UX states, scalable interaction patterns, and trust-focused decision flows.
- Built real-time **recording, proctoring, API integrations**, and candidate integrity workflows to support reliable skill assessment and evaluation.
- Owned frontend architecture, release execution, and deployment from prototype to launch, balancing speed, maintainability, and product iteration.

Frontend Engineer (Lead) - AI Recruitment Software

StartupHire

Aug 2023 – Jan 2024

Remote

- Led frontend delivery for a recruiting workflow **SaaS** platform covering candidate pipeline management, hiring operations, and recruiter productivity.
- Integrated multiple job boards and application sources, centralizing candidate intake, recruiter workflows, and pipeline visibility in one operating system.
- Managed delivery, deployment, QA, and iteration of recruiting automation and **GenAI-powered** product features from planning through release.

Frontend Engineer - Realtime Location SaaS

Locus Connect (NYCU)

Jul 2022 – Jul 2023

Hsinchu, Taiwan

- Built frontend systems for a real-time **3D indoor positioning platform**, integrating IoT telemetry, location data, and interactive visualization workflows.
- Developed interactive 3D experiences with **React**, **Three.js**, **GSAP**, state management, and rendering optimizations for smooth spatial data visualization.
- Improved indoor positioning accuracy from approximately **20cm to under 10cm** through HDOP optimization, telemetry analysis, and iterative calibration.
- Managed production infrastructure with **Docker**, **NGINX**, **load balancers**, and networking configurations to keep real-time visualization environments stable.

EDUCATION

National Yang Ming Chiao Tung University

Hsinchu City, Taiwan

Research Program, Computer Software Engineering

Jul 2023

Visvesvaraya Technological University

Karnataka, India

Bachelor of Engineering, Electronics and Communication

Sep 2022
